01/2022 - Present

Achievements/Tasks

- ▣ **Enhanced UI** : Expert UI designs for responsive devices boosted user engagement by 70%. Efficient coding and the use of React JS, along with popular frameworks and libraries, reduced page load times by 50%, enhancing the overall user experience and raising user retention by 40%.
- ▣ **Dynamic Animations**: Incorporated animations using jQuery, JavaScript, React, and cutting-edge animation libraries like AOS , GSAP , Framer Motion , Anime.js, delivering interactive user interfaces.
- ▣ **React and Next.js Proficiency** : Leveraged React's virtual DOM and Next.js for SSR, boosting SEO, routing, SSG, React Router and performance. Applied Hooks and Redux toolkit for state management.
- ▣ **Versatile Skills** : Pioneered multiple projects, autonomously delivering ahead of time. Increased team productivity by 30%, reinforcing my role as a dynamic team player.
- ▣ **JavaScript and ECMAScript 6** Excelled in vanilla JavaScript, achieving intricate DOM manipulations with finesse . Utilized ES6 features—arrow functions, promises, modules—to optimize code, boosting web app interactivity and cutting dev time by 25%.
- ▣ **Performance Optimization**: Optimized websites by using various approaches like optimising google reCAPTCHA, reusable functions, caching functions (memoization , callback functions), lazy-loading , Async JavaScript operations , leading to the best performance web-apps/websites by up to 35%
- ▣ **Mailer Templates and Website Development**: Worked on Mailer templates, website development, Bootstrap, implemented SEO, and created different responsive layouts using Grid and Flexbox.

LATEST PROJECTS

Ecommerce Platform (11/2023 - Present)

- ▣ Initiated my first project using the cutting-edge React framework, Next.js, renowned for its efficient routing system enabling dynamic route handling and the creation of SEO-friendly URLs. Gained expertise in implementing advanced techniques like Static Site Generation (SSG), Dynamic Routing, File Based Routing, static exports, and web pack bundling with Turbo Pack, unique to Next.js.
- ▣ Explored AWS server deployment, instance creation, and seamlessly integrated Git within web servers, expanding my knowledge of server infrastructure. Leveraged Node.js to incorporate the SendGrid mailing service for seamless contact form submissions, ensuring efficient communication with user.

PMIS tool (12/2022 - 05/2023)

- ▣ Spearheaded an individual project where I had the opportunity to work closely with the backend team, infusing dynamic code into the UI design, resulting in an enhanced user experience. Embarked on a collaborative journey with the backend team, unlocking the full potential of UI design through seamless integration of dynamic code.
- ▣ Witnessed remarkable transformations in UI aesthetics and functionality, leaving a lasting impression on users during my first independent project. Our collective efforts forged a powerful synergy, amplifying the impact of the design and creating an unforgettable digital journey for users.

EDUCATION

Master of Computer Applications

Manav Rachna International Institute of Reasearch & Studies

2018 - 2020
